# Trijicon® Company Profile

## TRIJICON'S VISION

Guided by our values, we endeavor to have our products used wherever precision aiming solutions are required to protect individual freedom.

## TRIJICON'S MISSION

Guided by our values, we will continue to be a leader in the design and manufacture of high-quality, innovative sighting systems for use by law enforcement, military and individual customers.

## TRIJICON'S VALUES

### ▼ HONESTY/INTEGRITY

We will be honest, dependable, trustworthy and fair towards each other, our employees, our customers and our suppliers.

### ▼ TEAMWORK/DEDICATION

We will work together as employees, customers and suppliers, valuing the unique contributions of each, to produce optimal aiming solutions.

### ▼ CUSTOMERS

We desire long-term relationships with our customers. We will listen and continually improve our products to meet their needs.

### ▼ QUALITY/INNOVATION

We will strive to attain a zero-defect rate in all our processes. Our products will be made to maximize durability and service life. We will continue to lead our industry by encouraging creative solutions.

### ▼ MORALITY

We believe that America is great when its people are good. This goodness has been based on biblical standards throughout our history and we will strive to follow those morals.

If you're seeking a riflescope or sight that combines superior any-light aiming accuracy with the finest craftsmanship and highest dependability, you can make no better choice than Trijicon.

In selecting Trijicon's Brilliant Aiming Solutions™, you will not only join the most discriminating hunters, law enforcement officers and military professionals, but also the world's leading gun manufacturers.

Glock, Smith & Wesson, Springfield and other elite producers offer Trijicon as original equipment on their firearms – more than any other illuminated system in the world.

Trijicon is clearly the industry leader in the design and manufacture of the world's finest illuminated gun sights, combat optics and variable-power riflescopes. Guided by our values, we will endeavor to be the leader in the design and manufacture of high-quality, innovative sighting systems.

Trijicon is the proud holder of numerous patents and trademarks on its family of illuminated aiming systems. To ensure accuracy and durability, all our products have undergone rigorous testing both in the field and in the lab. You can rest assured your Trijicon product will serve you brilliantly for years to come.

To learn more about Trijicon sights and scopes and their specifications, call 1-800-338-0563 or visit [www.trijicon.com](http://www.trijicon.com).

# Trijicon® Company Profile

Trijicon has led the industry in the development of any-light aiming systems since the company's founding in 1981.

Incorporating three decades of innovation, Trijicon's illuminated riflescopes and sights are the most advanced aiming systems available today.

Offering pinpoint aiming accuracy in all lighting conditions along with superior dependability and premium quality, Trijicon optics are the choice of hunters, law enforcement officers and military professionals who seek nothing less than the best.

## INNOVATION

Trijicon founder Glyn Bindon's interest in self-illuminated sights became the inspiration for using tritium (a hydrogen isotope) to provide scope luminescence. This innovation solved the problem long associated with traditional crosshair scopes (e.g., poor aiming-point contrast in low-light conditions). It also became the cornerstone of our exclusive dual-illumination technology.

During daylight hours, many Trijicon reticles are illuminated with light provided by a fiber-optic light collector. When ambient light fades, the reticle is illuminated with a tritium lamp.

As innovators in illuminated reticle technology, Trijicon has since incorporated advanced battery technology as well as solar cell solutions to its line of products.

## VISION

Glyn Bindon also devised a way to bring both-eyes-open shooting and magnified optics together for the first time in a discovery called the Bindon Aiming Concept™ (BAC).

When you move your firearm, your eyes focus on the unmagnified view, permitting high transitional speed and a wide field of view. As soon as a target is selected and your firearm stops moving, you focus on the magnified image. This is an automatic function of the human brain.

The result? A shooter employing BAC can track a target moving through the brush or in semi-darkness ... and then quickly engage for a shot.

## EXCELLENCE

With Trijicon aiming systems, these innovations are coupled with the highest quality coated lenses and the toughest housings. They are proven on the range and in the field. And, they're backed by a Lifetime Warranty.

As a result, Trijicon has earned the trust of those who are most in need of aiming accuracy. We are proud to count as our customers the Marines, Army Special Forces, Navy Seals, Federal Agents and Secret Service, just to name a few.

Trijicon is fast becoming the preferred scope among dedicated hunters for all types of game, as well as shooting enthusiasts worldwide.

## Trijicon® Military

Specified for use by the Marines, U.S. Army and Navy Seals, Trijicon scopes and sights have earned a reputation as the most sophisticated and dependable combat optics on the battlefield.

### PERFORMANCE

Clearing a dark basement, securing a sunlit alley, or engaging an enemy at 600 meters ...

On patrol, you can never be certain of your situation, so you better be sure your combat optic is a Trijicon. Trijicon aiming systems transition to all environments – from close quarters to long range – instantaneously. They are also extremely dependable with multiple options of reticle illumination

### SUPERIORITY

The suitability of Trijicon optics for combat is enhanced by their simplicity and durability. Moving parts are minimized, and adjustments are limited to only windage and elevation. In addition, all scopes and sights are tested beyond military specifications. One example: Trijicon ACOG® optics continue to function after water immersions to 500 feet/150 meters – nearly five times the test depth specified in military contracts.

### MISSION

With multiple models to choose from, there's a Trijicon combat optic that can help you accomplish your mission.

Your choices include (but are not limited to):

- ▼ ACOG®  
*(Advanced Combat Optical Gunsight)*
- ▼ SRS™  
*(Sealed Reflex Sight)*
- ▼ RMR®  
*(Ruggedized Miniature Reflex)*
- ▼ HD™ Night Sights
- ▼ TARS™  
*(Tactical Advanced RifleScope)*
- ▼ Trijicon® Reflex Sight

“In Afghanistan, my son and 4 other men were in a MRAP vehicle and came upon a IED. The truck was blown up in the air, flipped and landed on the roof. All men walked out of it bruised and alive! My son also walked out with his M4 and ACOG® attached scope, intact, and immediately used in a firefight. We won that also. Thank you for everything you do ... he and all of us are grateful.”

Model TA11MGO-M249  
3.5x35 ACOG®

## Trijicon® Hunting

For those who are seeking to make the most of their limited chances to hunt – or their once-in-a-lifetime opportunity to take home a trophy – choose Trijicon.

Through innovation and excellence, Trijicon has earned the accolades of dedicated hunters and professional outfitters the world over.

### ADVANTAGE

How many times have you missed the shot – or not even pulled the trigger – because it was too dark?

Never again, thanks to Trijicon sights and scopes.

Hunters know that the best hunting is often done at sunrise or sunset when light is scarce and game is active. That's when the brilliance of illuminated Trijicon optics comes through for you.

### CONFIDENCE

Trijicon aiming systems empower you to take low-light shots with confidence. That's because our revolutionary, illuminated reticle is clearly visible against the game – even at dawn or dusk.

Our optics have been proven in the field on countless hunts for every kind of game. Whether moving or still, your chances for hunting success are greatly increased thanks to Trijicon's both-eyes-open design and illuminated reticle.

Trijicon's legendary quality and durability enhance your odds.

### SELECTION

Whether you're hunting North American game or stalking one of Africa's big five, there's a Trijicon optic that can help you take your trophy animal.

Uncompromising aiming solutions for your preferred game:

- ▼ AccuPoint®  
*(Variable Powered RifleScope)*
- ▼ TARS™  
*(Tactical Advanced RifleScope)*
- ▼ Trijicon® Reflex Sight
- ▼ ACOG®  
*(Advanced Combat Optical Gunsight)*
- ▼ RMR®

## Trijicon® Law Enforcement

Among those who protect and serve, one brand of aiming systems stands out for accuracy and performance: Trijicon.

Whether called upon to pinpoint a target at long range, close quarters or any situation in between, Trijicon riflescopes and sights have earned the trust of everyone from patrol officers and SWAT team members to federal agents and others who carry firearms in the war on crime.

### VERSATILITY

From fast-action, close-encounter felony arrests to stand-offs with barricaded suspects and more, Trijicon aiming systems are field proven in all aspects of law enforcement.

For side arms, Trijicon Bright & Tough™ Night Sights offer unsurpassed accuracy. And, our non-magnified and fixed-power optics deliver the same level of confidence on your long guns and patrol carbines. With most, aiming points are illuminated at night or in low-light conditions by a special tritium lamp. During daylight, fiber optics automatically adjust the brightness level and contrast to available light conditions to maintain a crisp, clear reticle.

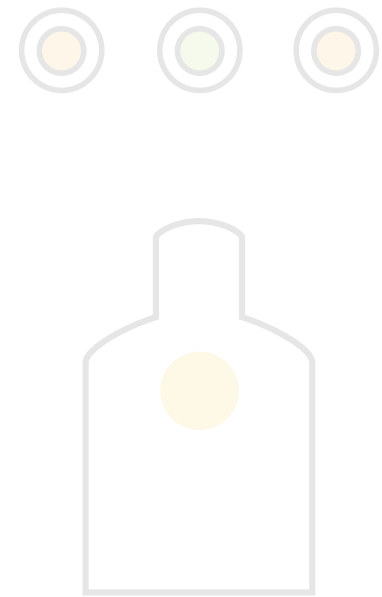

In every instance, you gain an optic with rugged, patrol-tested durability.

### SELECTION

Government agencies, police departments, SWAT teams and individual officers can select from several options.

Your choices include (but are not limited to):

- ▼ ACOG®  
*(Advanced Combat Optical Gunsight)*
- ▼ RMR®  
*(Ruggedized Miniature Reflex)*
- ▼ SRS™  
*(Sealed Reflex Sight)*
- ▼ Trijicon® Reflex Sight
- ▼ HD™ Night Sights
- ▼ Bright & Tough™ Night Sights
- ▼ TARS™  
*(Tactical Advanced RifleScope)*
- ▼ AccuPoint®  
*(Variable Powered RifleScope)*

“First let me say how happy I was we had Trijicon scopes on all our weapons during Hurricane Katrina. When all of our spare batteries were under four feet of water it was one thing I did not have to sweat. Most of New Orleans could only be described as a maritime environment. Scopes were submerged in highly corrosive water every day and not one of your scopes failed at all during this operation. I had plenty to think and worry about so not having to worry about your product was a great relief.”

Jim O'Hern  
Team Armour, New Orleans Police Department SWAT

“The [Trijicon] ACOG® [Advanced Combat Optical Gunsight] mounted on the M16 service rifle has proven to be the biggest improvement in lethality for the Marine Infantryman since the introduction of the M1 Garand in WWII.”

Major General James N. Mattis  
Commanding General of the 1<sup>st</sup> Marine Division

## Trijicon ACOG® Series

You never know where duty will find you. But you can arm yourself with the best scope around. The Trijicon ACOG® is rugged, reliable and ready to respond to any situation.

### CAPABLE

The Trijicon ACOG provides shooters with a distinct aiming point at anytime. Whether it's with the dual-illuminated combination of tritium and fiber optics or with Trijicon's new battery technology, the gunsight is reliably powered – delivering a glowing reticle regardless of lighting conditions.

Many models incorporate the innovative Bindon Aiming Concept™ (BAC). This revolutionary, both-eyes-open aiming method provides you with “instinctive” target acquisition and increased hit potential. And, the scope's ranging is built into many of its reticles, so you only need to set zero once for a multitude of ranging distances.

Broad-band, anti-reflective coated lenses provide superior clarity and light gathering capabilities with zero distortion. The ACOG also

offers large Eye Volume™, giving you greater leeway – fore and aft, and from side to side – with which to see through the lens. Of course, once the target is acquired, the ACOG is a trusted ally to help you zero in on a perfect shot.

### RUGGED

The ACOG is crafted with a tough, military-grade, aluminum-alloy housing and is waterproof to depths of 500 feet – making it nearly indestructible. Only the prism housing moves, so it's much

more rugged than conventional designs so you can rely on it to perform in practically every situation.

### TRUSTED

In selecting the ACOG, you're in good company. The world's very best company, in fact. The ACOG is the official Rifle Combat Optic of the U.S. Marine Corps and the U.S. Army. In addition, the Trijicon 4x32 ACOG is fielded by the Special Operations Forces.

The ACOG 6x48 features manual brightness control, so you can adjust the illumination brightness level and contrast of the reticle to suit your preference.

The Trijicon ACOG® (TA31RCO) is the official rifle combat optic of the U.S. Marine Corps and U.S. Army.

The Trijicon ACOG (TA31RCO) is the official rifle combat optic of the U.S. Marine Corps. The 4x32 model ACOG (TA31RCO-M150) was most recently chosen as the rifle combat optic of the U.S. Army.

The Trijicon 4x32 ACOG is available to the consumer market.

Like the military, hunters are looking for an optic to add to their arsenal that is rugged, dependable and operates in critical situations.

The unit's reticle features a red chevron aiming point and incorporates a Bullet Drop Compensator (BDC) which offers additional aiming points out to 800 meters. The Trijicon 4x32 is lightweight, versatile and mounts to any MIL-STD 1913 rail using the supplied mount.

Model TA31RCO-M4CP  
4x32 BAC

## Totally Battery Free

Trijicon ACOG delivers increased hit potential in all lighting conditions – without the use of batteries.

## Trijicon Fiber Optics

Automatically adjust the brightness level and contrast of the Trijicon reticle to available light conditions.

## Trijicon Tritium-Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate for 15 years on scopes equipped with fiber optics and 10 years on non-fiber optic scopes.

## Broad Band Anti-Reflective Coated Lenses

Multi-coated lenses provide superior clarity and light gathering capabilities with zero distortion.

Model TA31  
4x32 BAC

## Internally Adjustable

Since only the prism housing moves, the Trijicon ACOG is much more rugged than conventional designs.

**Waterproof to 500 Feet / 150 Meters**  
Dry-nitrogen filled to eliminate fogging.

Limited Lifetime Warranty

Made in the USA

## Bindon Aiming Concept™

Trijicon ACOG® models with illuminated reticles uniquely combine the Bindon Aiming Concept™ (BAC) – both-eyes-open shooting and magnified optics together, creating an aiming method that enables shooters to rapidly acquire, track and hit targets — in any light.

Seeing is believing; for a video demonstration of the Bindon Aiming Concept™, please visit [www.trijicon.com](http://www.trijicon.com).

### LED Reticle Illumination

**Powered by a Single AA Battery**  
Over 12,000 hours on setting 4 of 6 with supplied alkaline battery at 70° F (21°C).

**Military-Grade Aluminum-Alloy Housing**  
Forged 7075-T6 aircraft-aluminum-alloy housing provides for a nearly indestructible sighting system.

**Manually Adjustable Brightness Controls**  
Six brightness settings with an off in-between each setting.

Model TA02  
4x32 LED

Mounts to any MIL-STD-1913  
Rail Using Supplied Mount

**Waterproof to 500 Feet / 150 Meters**  
Dry-nitrogen filled to eliminate fogging.

Limited Lifetime Warranty\*

 Made in the USA

\*Electrical components warranted for 5 years from date of manufacture.

“With its new AccuPoint®, Trijicon has raised the bar on the innovations and features I’ve come to rely on. The new reticle options are highly effective in any light condition and the housing is as rugged as the environments in which I make my living.”

Craig Boddington  
Professional hunter and author

# Trijicon AccuPoint® Series

The Trijicon AccuPoint®, with its advanced fiber optics and numerous intelligent features, is one of the world's premier riflescopes and is the right choice for all light conditions and even the harshest environments.

## ADVANCED

The AccuPoint riflescope series combines advanced, self-luminous aiming technologies and superb clarity.

Available in a number of colors and reticle choices, Trijicon gives shooters the options they need to be successful.

## EFFECTIVE

All models in the AccuPoint series operate with tritium and fiber optic illumination technology. They also feature Trijicon's Manual Brightness Adjustment Override, which allows you to control the light output of the fiber optics during daylight.

AccuPoint riflescopes are loaded with other advanced optical elements like multilayer coated lenses for superior light transmission with no distortion. There's also a quick-focus eyepiece, long-eye relief, and precise windage and elevation adjustments.

## TOUGH

The AccuPoint's rugged construction protects it from the toughest elements. It's crafted from aircraft-quality, hard-anodized aluminum with a tube that's nitrogen-filled to prevent corrosion and eliminate fogging. A solid, black-matte finish eliminates glare and light

reflection, which could spook game. The AccuPoint is the hunter's clear choice for even the most challenging conditions.

Model TR24  
1-4x24

Model TR20

# Trijicon AccuPoint®

**Trijicon Fiber Optics**  
Automatically adjusts the brightness level and contrast of the Trijicon Aiming Point reticle to available light conditions.

**Manual Brightness Override**  
Easily adjust the Trijicon Aiming Point brightness to your personal preference.

**Solid, Black-Matte Finish**  
Eliminates glare and light reflection.

**Easy-Focus Eyepiece**  
Ensures unsurpassed edge-to-edge optical clarity.

**Longer Eye Relief**  
Provides unparalleled eye relief and protects against high-impact recoil from larger caliber rifles.

**Limited Lifetime Warranty**

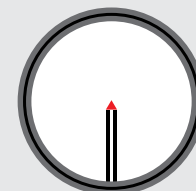

**Scope Body is Crafted from Aircraft-Quality, Hard-Anodized Aluminum**  
All-weather rugged construction protects against the toughest elements.

Model TR20G  
3-9x40

**Multi-Layer Coated Lenses**  
Superior clarity and light gathering capabilities with zero distortion.

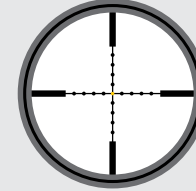

**Trijicon Tritium-Phosphor Lamp**  
Aiming reticle glows in low-light conditions for quick target acquisition — with no batteries to fail.

## Trijicon TARS™

The Trijicon TARS™ (Tactical Advanced RifleScope) variable powered riflescope is as rugged as the Trijicon ACOG®, but with the precise adjustability that long-range shooting demands. It's made in the U.S.A. and packed with features like a first focal plane reticle, reliable LED illumination with ten settings and locking external adjusters.

### HIGH-PERFORMANCE

The Trijicon TARS is the pinnacle of Trijicon's high-performance long-range riflescopes. It's designed with an LED first focal plane reticle that's always in perfect proportion to your target. Simply put; it zooms when you zoom. Since there is no need to make complex calculations on the fly, it delivers faster, more accurate aiming in critical situations.

Particularly effective with Trijicon's unique MOA-scale and patent-pending MIL-scale reticles, the Trijicon TARS was developed to meet the unique high-performance needs of long-range military/law enforcement shooters, and competition shooters, as well as hunters who stalk long-range game.

### RELIABLE

Being ready for anything is a hallmark of Trijicon optics, and the Trijicon TARS is no exception. It's constructed to be just as tough as the legendary Trijicon ACOG and features an aircraft quality anodized aluminum body with ultra-durable hardware and rugged controls.

Running on a long-lasting lithium CR2032 battery, it provides reliable power to the LED illuminated reticle. The external adjusters have a locking mechanism, preventing unintentional adjuster rotation — assuring the Trijicon TARS will always be ready to shoot on target. Trijicon's patent-pending absolute zero technology allows a reliable return to zero, every time.

### ADAPTABLE

Because you can never predict all conditions, the Trijicon TARS is designed to adapt easily to variable conditions. Its LED illuminated reticle system is adjustable and features 10 settings; seven for daytime and three for night vision equipment.

The Trijicon TARS is available in two adjuster/reticle configurations, MOA and MIL. In either case, the reticle and adjusters are measured utilizing the same units — making quick target adjustments much easier.

Flip caps and sun shield are standard and are removable to allow for anti-reflection devices.

## Trijicon RMR® Series

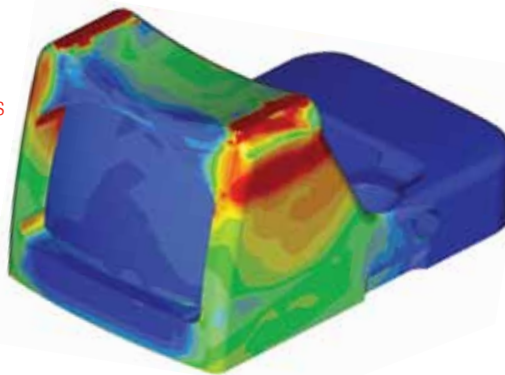

When precision is the only option, your best option is the Trijicon RMR® sight. Built to provide optimum red-dot visibility with a minimal profile, you can acquire and hit your target quickly and more accurately.

### STRONG

The Trijicon RMR (Ruggedized Miniature Reflex) is the toughest red dot sight on the market today but still offers an amazing combination of lighting quick target acquisition and precision aiming.

The RMR is available in three models. The first model utilizes an innovative high efficiency LED and adjusts the aiming point brightness automatically. The second model also features a high efficiency LED and has automatic and manual brightness controls. The third option is the dual-illuminated battery-free model featuring Trijicon fiber optics and tritium.

The RMR housing design incorporates computer-optimized geometry that absorbs impacts and diverts stresses around and away from the lens. This design improves durability and eliminates the need for protective shields or covers.

Regardless of your preference, all RMR's ensure optimum visibility of the red dot against the target in any lighting situation.

### PRECISE

Accuracy is further enhanced with adjustments for windage and elevation. And clarity is assured with the sight's ultra-clear, hard-coated lens. The LED RMR's are powered by a long-life lithium battery that delivers 17,000 hours of battery life or more. The dual-illuminated RMR never needs batteries, thanks to its tritium and fiber-optic illumination.

Designed with a rugged aluminum housing, the RMR delivers superior performance under the most extreme conditions for virtually all military, law enforcement, and for all types of hunting and shooting applications. This versatile sight is right on target for handguns, carbines, rifles and shotguns.

In a recent Norwich University study\* of traditional pistol iron sights vs the pistol mounted Trijicon RMR red dot sight, the RMR was hands-down more accurate. The study tested shooters in a variety of distance/speed situations and in every stage of the study those shooting the handgun paired with Trijicon RMR hit the center mass of the target with greater proficiency.

\* Results based on 2011 Study conducted by the Department of Justice Studies and Sociology Norwich University, Northfield, Vermont

## Bright LED Illumination

Auto-adjusts for brightness in any light situation.

## True-Color Multi-Coated Lens

Creates a wide-band light transmission for minimal change in target area color.

## Adjustable Windage

Easily adjustable without special tools. 1 MOA per click.

## 7075-T6 Military-Grade Aluminum-Alloy Housing

For extreme durability.

## Long Lasting Battery Life

Battery lasts up to 4 years at brightness setting 4 on Adjustable LED Version. LED Version battery designed to last up to 2 years during normal usage.

## Waterproof

Completely waterproof to a depth of 66 feet/20 meters.

## Limited Lifetime Warranty\*

## Adjustable Elevation

Easily adjustable without special tools. 1 MOA per click.

## Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the reticle to available light conditions.

## Trijicon Tritium-Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate up to 15 years.

## Trijicon SRS™

With a rugged, ultra-compact housing and unique optical geometry that eliminates “tube-effect”, the Trijicon SRS™ (Sealed Reflex Sight) is the most highly engineered, best performing sealed reflex-style sight anywhere.

### **DISTINCTIVE**

Upon picking up and looking through the Trijicon SRS the first thing one notices is that it offers a distinctly different view. The shorter housing and unique optical geometry is much more open than other close combat optics and virtually eliminates the “tube-effect” typically associated with them. It features a 28mm aperture that provides a massive field of view for quicker target engagements.

### **SMART**

Designed for close quarters and the toughest duty, the housing has been optimized to create an ultra-compact profile that reduces dangerous snags and offers

maximum agility. With a more streamlined design, the Trijicon SRS also allows more free space on the rail so additional components can be added and even more versatility is gained.

### **HYBRID TECHNOLOGY**

The LED illuminated reticle has 10 settings to suit your specific conditions. They can easily be dialed in by right-handed or left-handed shooters with the ambidextrous push-pad style buttons. At 1.75 MOA the SRS dot is one of the smallest — and most precise — dots produced.

Finally, the Trijicon SRS features dual power sources — an innovative solar cell that is assisted by a single AA battery. The solar cell acts as the primary power source, while the battery is drawn upon only as conditions become darker. The result is in an estimated minimum battery life of at least 3 years on setting 7 of 10 and only adds to its long-term reliability.

**Manually Adjustable Brightness Controls**  
10 brightness settings, including 3 night-vision and 1 super-bright.

**Compact Snag Free Design**  
Eliminates "tube effect" when looking through optic and allows more rail space for additional accessories.

**Military Grade Aluminum-Alloy Housing**  
Forged 7075-T6 aircraft-aluminum-alloy housing provides for a nearly indestructible sighting system.

**Waterproof to 165 ft. (50m)**  
Dry nitrogen filled to prevent fogging.

**Limited Lifetime Warranty\***

 **Made in the USA**

**Hybrid Technology - Solar Panel**  
Photovoltaic cell automatically provides power when outside during daylight conditions, further increasing battery life.

**Multi Layer Broadband Anti-Reflective Coating**  
Parallax-free 38mm objective lens provides a larger field of view. Unique lens design helps create a much shorter optic.

**One (1) AA Alkaline or Lithium Battery**  
Over 3 years of continuous use at brightness setting 7 of 10 at 70°F with supplied lithium battery, even in dark storage.

“My life has depended upon my being able to accurately fire my weapon in almost total darkness. Not having to worry about seeing the ‘dot’ is a benefit only appreciated by those of us who have been in a no/low-light altercation. Thank you.”

M. Sanders  
Tennessee

## Trijicon® Reflex Series

When you're in the field, it's you, your weapon and your Reflex. With its wide peripheral view, the Trijicon® Reflex helps you quickly engage and lock onto moving targets, providing speed and precision for critical situations. It's the precise advantage you need.

### AGILE

Dual-illuminated and parallax free, Trijicon Reflex offers increased field-of-view capabilities that provide fast, both-eyes-open target acquisition and accurate aiming for the military, law enforcement and hunting enthusiasts.

The RX30 Reflex sight features a 42mm, clear-aperture lens for a generous field-of-view and a large sight picture. It allows you to move the firearm freely and remain on target at multiple shooting angles when surveying an area. As a result, the Reflex is considered by

many marksmen to be the fastest and most user-friendly sight in the field — any field.

Allowing accurate both-eyes-open shooting that expands peripheral view, this advanced sight provides a critical advantage when you're aiming on the move, in low-light situations, or even in darkness.

### VERSATILE

With the Reflex, a glowing tritium lamp ensures a bright amber reticle at night or in low-light conditions, while advanced fiber optics deliver ambient light to the aiming point during the day. A multi-layer dichroic-mirrored lens delivers wide-band light transmission.

And, adjustments for windage and elevation further improve accuracy.

Reflex is available with three reticle options to match your shooting requirements: one triangle and two different size dots.

### DEPENDABLE

Nearly indestructible, the Reflex features a military-grade housing that's cast from aircraft-grade aluminum alloy. Tested to military standards, the sight stands up to and performs under the most extreme environmental conditions. Batteries? None needed; it's totally battery free.

# Trijicon TriPower® Series

When you've only got one chance at the perfect shot, make sure you've got the Trijicon TriPower®. With three light sources, you can rely on this sight to perform in broad daylight, at night and everything in between.

## INNOVATIVE

The world's first triple-illuminated sight, the Trijicon TriPower is a fail-safe sighting system that delivers a clear aiming point at all times – making it ideal for fast-moving, close-in shots.

Performance is assured with the TriPower's three innovative light sources. An integrated fiber-optic system collects ambient light during daylight hours and delivers it to the reticle while automatically adjusting for brightness and contrast. A tritium-powered phosphor lamp illuminates the reticle to provide a distinct aiming point at dawn, dusk or in total darkness. The third power source is an on-call battery for fail-safe backup. It ensures a clear aiming point under a wide variety of light conditions.

## ADAPTIVE

Designed for mounting on long guns, the TriPower features a red, chevron-shaped reticle that's parallax free for fast target acquisition. Accuracy is enhanced with broad-band, anti-reflective coated lenses that allow optimal light transmission and deliver optical clarity.

## RELIABLE

The TriPower goes beyond power-source redundancy to ensure reliable performance in the field. It features a military-grade, forged-aluminum-alloy one-piece housing. Completely sealed, it's waterproof to a depth of 100 feet.

The rubber cover obscures the TriPower's fiber optics so you can stay hidden in the dark when you need the element of surprise.

In low-light conditions and even in total darkness, a tritium-phosphor lamp illuminates the aiming reticle.

During daylight hours, a fiber-optic system adjusts the brightness level and contrast of the reticle.

An advanced battery system provides a backup light source for a crisp, luminous reticle at all times.

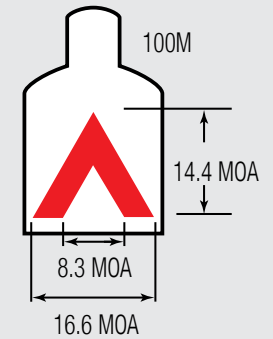

Model TX30  
1x30

# Trijicon TriPower®

## Trijicon TriPower® Reticle:

### Trijicon Fiber Optics

Trijicon's ultra-reliable fiber-optics system adjusts the brightness level and contrast of the reticle to the available ambient light. The chevron-shaped reticle presents a crisp, clear aiming point, even in the brightest light.

### Military-Grade Forged-Aluminum 1-Piece Housing

Forged 7075-T6 aircraft aluminum-alloy 1-piece housing provides for a nearly indestructible sighting system.

### Battery Illumination Switch

### Trijicon's Tritium-Illuminated Reticle

Thanks to Trijicon's tritium-powered phosphor lamp, the reticle provides a distinct aiming point, even in total darkness.

### Threaded Objective and Eyepiece

Enables mounting of various adapters, secondary mounts or lens covers, including flip covers.

**Waterproof**  
Completely sealed and waterproof to a depth of 100 feet /30 meters.

### Limited Lifetime Warranty

Made in the USA

### On-Call Battery Backup

### Adjustable Windage and Elevation

Sealed external windage and elevation adjusters. (Normal adjustment range  $\pm 1.25$  degrees.)

### Broad Band Anti-Reflective Coated Lenses

Allows optimum light transmission and optical clarity.

### 30mm Tube

Allows use of 30mm rings and scope mounts.

# Trijicon Bright & Tough™ Night Sights

## Trijicon HD™ Night Sights

### Trijicon TrijiDot™

Featuring glowing, self-illuminated lamps for a distinctive shooting picture, Trijicon® Night Sights are the reliable choice for all light conditions, providing superior illumination and impressive accuracy.

#### **BRIGHT & TOUGH™ NIGHT SIGHTS**

Trijicon Bright & Tough Night Sights are three-dot iron sights that increase night-fire shooting accuracy by as much as five times over conventional sights. Equally impressive, they do so with the same speed as instinctive shooting – and without the need for batteries.

Three tritium-filled phosphor lamps provide the illumination for Bright & Tough Night Sights. Select models also feature a white ring around the glowing dots for unequalled daylight visibility. Choose from standard green or optional orange or yellow rear dots.

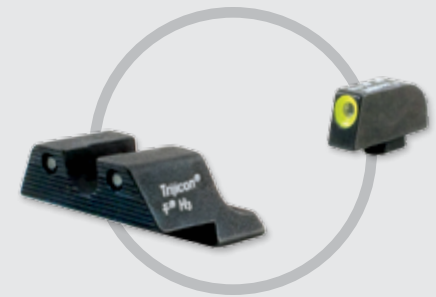

Housed in a metal body, manufactured to fit specific handgun make and models, and cushioned within silicone rubber, Bright & Tough Night Sights feature a unique shock-resistant design that is patented by Trijicon.

#### **HD™ NIGHT SIGHTS**

Building on the strength, durability and luminance of the Bright & Tough Night Sights, the new HD Night Sights were specifically created to address the needs of tactical shooters. The front sight features a taller blade and an aiming point ringed in photoluminescent paint. While the rear sight is outlined in black and features a wider U-shaped notch. This unique configuration increases visibility and quickens sight acquisition—even in transitional lighting. Additionally, the front surface is steeply hooked to assist in emergency one-handed slide operation. The new HD Night Sights are designed to shine—even in the most demanding conditions.

#### **TRIJIDOT™ FIBER OPTIC SHOTGUN SIGHT**

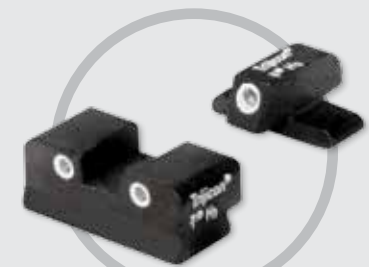

Trijicon is proud to offer this simple but effective bead sight specifically designed for shotguns. Utilizing Trijicon's fiber optic technology and sapphire cap, the fiber optic shotgun sight collects ambient light to provide a brilliant aiming point in a wide range of lighting conditions. Constructed of anodized 6061-T6 aluminum, it's built to withstand shotgun recoil, elevated barrel temperatures and years of field use. It's available in three sizes to fit most shotguns with rib widths between 0.230" and 0.400".

## Custom Gunsmithing Service:

Some pistol and revolver models require factory-precision gunsmithing installation service. You may ship the slide of a semi-auto pistol or a revolver via UPS directly to:

**Tooltech Gunsight • 20 Church Street, Oxford, MI 48371 • Ph: (248) 628-1811 • [www.tooltechgunsight.com](http://www.tooltechgunsight.com)**

The system will be installed and returned to you via UPS. On automatic pistols, please send only the slide. Tooltech Gunsight has been installing Trijicon Bright & Tough Night Sights systems since 1985 and has received the required NRC licensing. We recommend their service. Contact Tooltech Gunsight directly to obtain a current price list.

# Trijicon AccuPin™ Bow Sight

## Trijicon ACOG® Crossbow Scope

Created by the world leaders in illuminated riflescopes, Trijicon now brings their brilliant aiming solutions beyond the world of firearms. The Trijicon AccuPin™ and Trijicon ACOG® Crossbow Scope are both breakthroughs in sight technology, designed and engineered specifically for archers.

### TRIJICON ACCUPIN™ BOW SIGHT

The heart of Trijicon AccuPin's innovative design lies in its triangular aiming tip and clear aiming pin. With a precision aiming point and zero obstructions, this one-of-a-kind configuration has an aiming point that actually points to your target instead of obscuring it. It's an entirely new perspective and gives archers the most precise bow sight available.

For the ultimate in visibility and aiming precision—even in the toughest conditions—the AccuPin incorporates the acclaimed Trijicon dual-illumination/battery-free system. With a combination of fiber optics and tritium pioneered and perfected in their world-class riflescopes, the Trijicon AccuPin is the brightest pin sight on the market. Regardless of lighting conditions, the high contrast aiming point lets you acquire targets with complete confidence.

Designed to enhance the Trijicon AccuPin is the Trijicon AccuDial™ mount, equipped with BowSync™ technology. With an infinitely variable transmission, it enables exact range adjustment and synchronization for any bow/arrow combination. Its laser etched dial makes for quick and accurate adjustments. Together, the AccuPin and AccuDial form a refined system that stands as a benchmark for sight and mount integration.

The Trijicon AccuPin™ and its combination of fiber optic and tritium illumination are Pope & Young Legal.

Built using only the finest materials, finishes and components, the AccuPin continues the Trijicon tradition of rugged reliability. In an independent study that simulated ten years of daily field use, it was still in perfect working order and as accurate as day one. If that doesn't prove how tough it is, just consider this: The Trijicon AccuPin is backed by a limited lifetime warranty.

### TRIJICON ACOG® CROSSBOW SCOPE

The Trijicon ACOG® Crossbow Scope is the first truly high performance optic designed specifically for crossbows. It utilizes the same platform as the legendary Trijicon ACOG®, so it's tough, accurate and reliable too— thanks to Trijicon's battery-free dual-illumination system of fiber optics and tritium. At 5.89 ounces, it stands as the lightest weight magnified crossbow optic on the market.

To meet the demands of today's high-performance crossbows, it's available with three reticle options that accommodate speeds from 300 fps to 450 fps. Each specially designed reticle features bolt drop stadia lines (out to 80 yards) designed to deliver the accuracy of a BDC (Bullet Drop Compensator) equipped long-range rifle scope. Bad River Outdoors' deer/elk ranging capabilities are also built into each reticle. Together they provide the ability for ranging and hold-over, all in the field of view; the first reticle of its kind on the market.

# Trijicon ACOG® Crossbow Scope

Model TA50G-XB1  
3x24 XB

## Lightweight Ruggedness

Forged 7075 aircraft-grade aluminum housing provides extreme durability in a compact package.

## Totally Battery Free

Trijicon ACOG delivers increased hit potential in all lighting conditions – without the use of batteries.

## Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the Trijicon reticle to available light conditions.

## Internally Adjustable

Since only the prism housing moves, the Trijicon ACOG Crossbow Scope is much more rugged than conventional designs.

## Broadband Anti-Reflective Coated Lenses

Multi-coated lens provide superior clarity and light gathering capabilities with zero distortion.

Model TA50G-XB1  
3x24 XB

## Waterproof

Completely sealed and waterproof to a depth of 328 feet /100 meters.

## Limited Lifetime Warranty

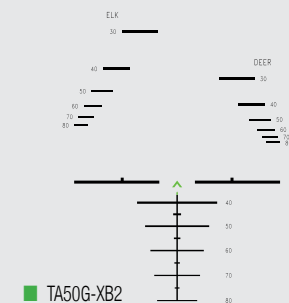

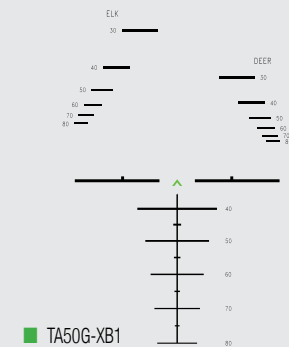

## Trijicon Tritium Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate for 15 years.

## Trijicon ACOG® Crossbow Scope:

The ACOG Crossbow Scope reticles feature Bad River Outdoors® patented ranging system for elk and whitetail deer. The three reticles below have varying bolt drop compensators based on crossbow speed (see chart on the next page).

# Trijicon ACOG® Crossbow Scope Model Specifications

Model	3x24 XB
Magnification	3x
Objective Lens	24mm
Eye Relief	1.4 in.
Exit Pupil	8.0mm
Field of View	4.9°
Field of View @ 100 yards	25.6 ft.
Adjustment Increments	9 clicks per in. @ 30 yards
Length	5.0"L x 1.5"W x 2.1"H
Weight (Without Mount)	5.89 oz.
Illumination Source	Tritium & Fiber Optics

	Bow Speed
TA50G-XB1	300-340 fps
TA50G-XB2	340-400 fps
TA50G-XB3	400-440+ fps

Note: If your bow speed borderlines between two models, choose the ACOG Crossbow Scope Model with the lower speed.

## RETURN POLICY

Please return all items to place of purchase. If you purchased the item directly from Trijicon, Inc. you must call for a Trijicon Return Authorization Number (RAN). Products cannot be returned for credit after six months from purchase date. Items being returned for credit must be accompanied by a copy of the original invoice or purchase order for each item listed in the return for credit. There will be a 20% restocking fee on returned merchandise.

## REPAIRS

All Trijicon products are designed and manufactured to provide customers with years of reliable performance. In the event your Trijicon product requires factory service or warranty claim evaluation, please visit [www.trijicon.com](http://www.trijicon.com) or call 1-800-338-0563 to obtain a Return Authorization Number (RAN).

## LIMITED LIFETIME WARRANTY

Trijicon warrants that products manufactured by Trijicon will be free from defects in material and workmanship for the lifetime of the original owner. Trijicon will repair or replace (at our option) the registered product. This warranty does not apply to defects caused by anything which is deemed abnormal, abusive, or improper including any fault resulting from an accident or improper service. This warranty specifically applies to the optical systems and metal structure of the product and does not apply to the illumination system.

### **TARS™, Battery ACOG®, SRS™, RMR® (LED and Adjustable LED Versions) and TriPower®:**

Electronics are warranted to be free of defects in material and workmanship during normal use for a period of five (5) years from date of original manufacture.

### **AccuPin™ Bow Sight:**

The tritium lamp is warranted to glow for twelve (12) years in the bow sight from date of original manufacture.

### **ACOG® Crossbow Scope, ACOG®, Reflex, RMR® (Dual-Illuminated Version), AccuPoint® and TriPower:**

The tritium lamp is warranted to glow for fifteen (15) years in fiber optic scopes and ten (10) years in non-fiber optic scopes from date of original manufacture.

### **Bright & Tough™ Night Sights and HD™ Night Sights:**

The tritium lamp is warranted to glow for five (5) years for orange night sights, twelve (12) years in green and yellow night sights

**SPECIAL NOTE:** Many Trijicon PRODUCTS CONTAIN TRITIUM AND ARE REGULATED BY THE NUCLEAR REGULATORY COMMISSION. THEY MAY NOT BE DISASSEMBLED BY ANYONE OTHER THAN TRIJICON, INC WHICH HOLDS THE NECESSARY LICENSES. Any attempt at disassembly or repair will annul this warranty. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

## EXPORT COMPLIANCE

Trijicon Products are subject to export controls administered by the U.S. Department of Commerce or the U.S. Department of State and require an export license to be shipped outside of the United States. Export or re-export without prior authorization from the U.S. Government is prohibited. For this reason, we only sell directly to established distributors, who have provided the necessary information and documentation required for proper authorization to export. For a list of distributors in your country, please visit [www.trijicon.com](http://www.trijicon.com).

For additional information, please contact the Trijicon Export Compliance Team by calling 1-248-960-7700 or emailing [exportcompliance@trijicon.com](mailto:exportcompliance@trijicon.com).
